

DESIGNJET Z2100 & Z3200 Photo Printer Series

How to verify which firmware you need to download

There are currently three different revisions of your HP Designjet Z2100 Photo Printer Series, and two different revisions of your HP Designjet Z3200 Photo Printer Series. Each of the models has a different Product No. The firmware file you need to download will depend on the Product No. of your printer and will be clearly specified in the title that you will see on the “Download drivers and software” web page.

How to check the Product No. of your printer
